

Personal Information

JEMUEL H. CADAYONA

SOFTWARE DEVELOPER

I'm a passionate Software Developer with a strong focus on building efficient, user-centric applications. I specialize in full-stack web development and enjoy solving real-world problems through clean, scalable code.

Address: Bontoc, Southern Leyte, Philippines

Contact Number: 09275021810

Birth Date: August 03, 2001

e-Mail: cdynjm@gmail.com

Portfolio: <https://jemcdyn.vercel.app/>

Github: <https://github.com/cdynjm/>

Educational Background

Bachelor of Science in Information Technology

Southern Leyte State University - Main Campus

Graduated: 2023 | Cum Laude

Professional Experiences

Software Developer | Consultant

Provincial Systems A.O. (Capitol Site, Southern Leyte, Phil.) | Remote
2024 - Present

- ✓ Leading the design, development, and deployment of enterprise-grade web applications and internal government systems. Building scalable full-stack solutions using Next.js, React, TypeScript, tRPC, Prisma, Laravel, and MySQL. Responsible for system architecture, database design, API development, performance optimization, CI/CD automation, and maintaining secure, reliable production environments that streamline office operations and document management workflows.
- ✓ Maintained secure production environments while ensuring reliability, uptime, and system stability.

Full Stack Developer

Freelance | Remote

2023 - Present

- ✓ Designing, developing, and maintaining custom web applications for clients across various industries. Delivering end-to-end solutions ranging from system architecture and database design to frontend development and deployment. Building modern, scalable applications using Laravel, Next.js, React, TypeScript, Prisma, and MySQL while focusing on performance, security, and user experience.

On-the-Job Training (OJT): System Developer

FCSIT Building, SLSU Main Campus

February - June 2023

- ✓ Developed two internal systems: (1) a Capstone Project Repository — an online archive system for student capstone projects, and (2) a QA File Management System — designed for document handling and compliance under the QA office of SLSU.
- ✓ Handled a freelance client from Maasin City, developing a Graduate Studies Profiling Management System to assist in tracking academic records and profiles of graduate students.

Technical Skills and Tools

Frontend:

- ✓ Next.js, React.js, Vue.js, Inertia.js, TypeScript, TanStack Query, Tailwind CSS, Shadcn UI

Backend:

- ✓ Laravel, Livewire.js, Next.js, TypeScript

Databases and Data Handling:

- ✓ MySQL, Prisma

Authentication:

- ✓ NextAuth.js for Next.js projects

Mobile Development:

- ✓ Expo

Development Tools and APIs:

- ✓ Git, GitHub Actions, Vite, GraphQL, Doppler centralized cloud-based secrets platform, tRPC (TypeScript Remote Procedure Call)

Automation and Infrastructure:

- ✓ Oracle Cloud Infrastructure
- ✓ Claude AI, Groq AI

Certificates

- ✓ **Document Tracking Assistant Certificate** | completed this certification for developing the Document Tracking Assistant for the Province of Southern Leyte
- ✓ **Enablement Certificate** | Participated the ASEAN Data Science Explorers in 2023. An Enablement Session - SAP Analytics Cloud training session

Featured Achievements

- ✓ **April 2026** | Successfully designed, developed, and implemented the Budget Transaction and Control Keeper System, a comprehensive platform for managing, monitoring, and controlling budget transactions across various departments. The system provides accurate tracking of budget allocations, expenditures, and financial reporting, helping improve transparency, accountability, and the efficient utilization of government resources. The implementation streamlined budget-related workflows and enhanced financial oversight within participating offices.
- ✓ **March 2026** | Developed the SOLEPGEA System and conducted a series of meetings, consultations, demonstrations, and stakeholder discussions during February and March 2026. The platform was designed exclusively for the Provincial Government of Southern Leyte Employees Association (SOLEPGEA) to manage employee association records, membership information, benefits, and loan transactions. The discussions focused on gathering requirements, validating workflows, presenting system features, and ensuring the platform aligned with the operational needs of the association. The SOLEPGEA System is a privately developed platform created specifically for SOLEPGEA and is not a government-owned system.
- ✓ **August 2025** | Conducted a comprehensive discussion on key issues, gathered user feedback, and facilitated an open forum to address concerns and share insights. Presented recommendations to further enhance the Document Tracking Assistant System, ensuring improved usability and alignment with office needs at the Capitol Site of Southern Leyte.

- ✓ **January 2025** | Conducted a follow-up orientation in January 2025, focusing on the full implementation of the Document Tracking System. The session included in-depth user demonstrations, system navigation, and real-time simulations to ensure smooth adoption and operational efficiency across all offices at the Capitol Site of Southern Leyte.
- ✓ **November 2024** | Conducted the initial orientation and training session for the Document Tracking System in November 2024 at the Capitol Site offices in Southern Leyte. The session introduced staff to the system's features and workflow, aimed at improving document processing efficiency and enhancing overall transparency in transactions.
